

Electromagnetic Insertion flowmeter

- Sensor without moving parts
- Flowmeter with 2-point control function
- Application-specific calibration via teach-in functionality
- Clean in place (CIP) compatible
- FDA-compliant materials

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

Type 8025

Insertion flowmeter or batch controller with paddle wheel and flow transmitter or remote batch controller

Type 8802

ELEMENT continuous control valve systems – overview

Type 8619

multICELL – multi-channel/multi-function transmitter/controller

Type 8644

AirLINE SP electropneumatic automation system

Type description

The electromagnetic flowmeter Type 8041 consists of an electronic module and a sensor made from PVDF or stainless steel. It is suitable for pipelines with nominal diameter of DN 06...DN 400 and neutral or aggressive liquids with conductivity greater than 20 $\mu\text{S}/\text{cm}$.

Type 8041 is fitted with a 4...20 mA current output, a frequency output and a relay output. The device is configured using 5 DIP switches, a push button, and a 10-segment LED bar graph.

This flowmeter is available with either a G 2" connection for a PVDF sensor or a G 2" or clamp connection for a stainless steel sensor, both of which are designed for use with a Type S020 Insertion fitting.

The variant with stainless steel sensor is for applications with higher pressures (PN 16) and higher temperatures (150 °C).

1.) Under reference conditions i.e. measuring medium = water, ambient and water temperature = + 20 °C (+ 68 °F), observing the minimum the minimum inlet and outlet sections and the appropriate inner diameter of the pipe.

2.) Not evaluated by UL

2. Approvals and conformities

2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available variants of the device can be supplied with the below mentioned approvals or conformities.

2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

2.4. Pressure Equipment Directive (PED)

The device conforms to article 4, paragraph 1 of the Pressure Equipment Directive (PED) 2014/68/EU under the following conditions:

Device used on a pipe

Note:

- The data in the table is independent of the chemical compatibility of the material and the fluid.
- PS = maximum admissible pressure (in bar), DN = nominal diameter of the pipe

Type of fluid	Conditions
Fluid group 1, Article 4, Paragraph 1.c.i	DN ≤ 25
Fluid group 2, Article 4, Paragraph 1.c.i	DN ≤ 32 or PS*DN ≤ 1000
Fluid group 1, Article 4, Paragraph 1.c.ii	DN ≤ 25 or PS*DN ≤ 2000
Fluid group 2, Article 4, Paragraph 1.c.ii	DN ≤ 200 or PS ≤ 10 or PS*DN ≤ 5000

2.5. North America (USA/Canada)

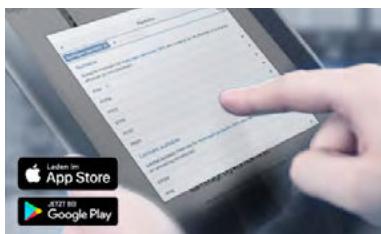

Approval	Description
	Optional: UL Recognized for the USA and Canada The products are UL Recognized for the USA and Canada according to: <ul style="list-style-type: none"> UL 61010-1 CAN/CSA-C22.2 No. 61010-1

2.6. Foods and beverages/Hygiene

Conformity	Description
	FDA – Code of Federal Regulations Only devices with stainless steel or PVDF sensor and FKM or EPDM seals are compliant with the Code of Federal Regulations published by the FDA (Food and Drug Administration, USA) according to the manufacturer's declaration.
	EC Regulation 1935/2004 of the European Parliament and of the Council Only devices with stainless steel sensor and EPDM seals are compliant with EC Regulation 1935/2004/EC according to the manufacturer's declaration.

5. Performance specifications

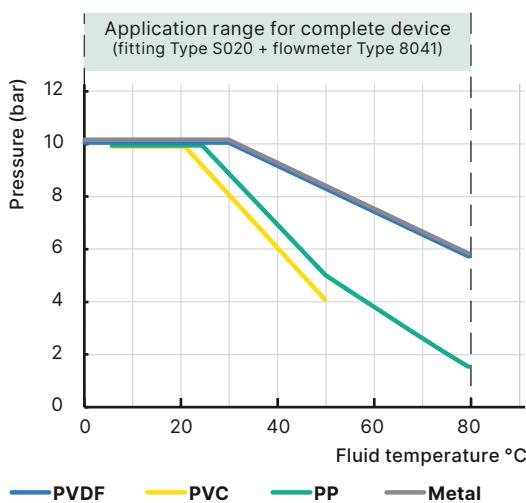

5.1. Pressure temperature diagram

Flowmeter with a PVDF sensor

Note:

Take into account the dependence between fluid pressure and temperature according to the fitting and flowmeter material shown in the following diagram.

See [data sheet Type S020](#) ▶ for more information.

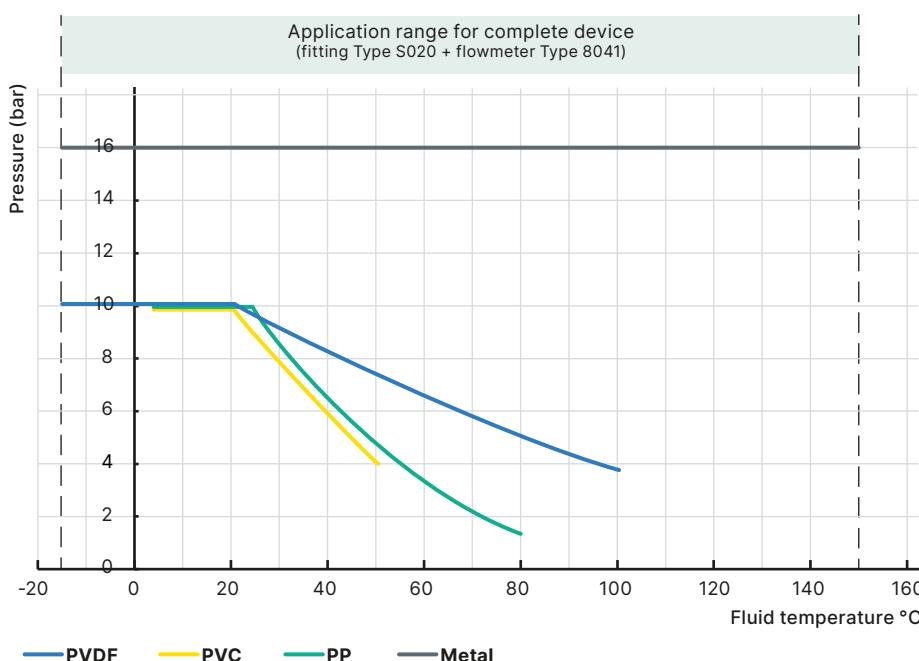

Flowmeter with a stainless steel sensor

Note:

Take into account the dependence between fluid pressure and temperature according to the fitting and flowmeter material shown in the following diagram.

See [data sheet Type S020](#) ▶ for more information.

6. Product installation

6.1. Installation notes

Flow measurement

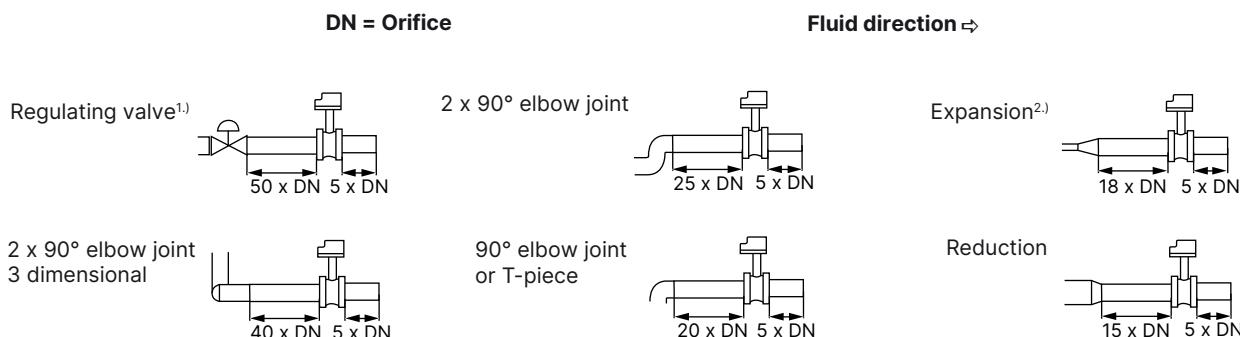

Note:

The device is not suitable for use in gaseous media and steam.

Minimum straight distances upstream and downstream of the sensor must be observed. These stabilizing distances depend on the pipe's design. Increasing these distances or installing a flow conditioner may be necessary to obtain the best accuracy. For more information, refer to EN ISO 5167-1.

EN ISO 5167-1 specifies the straight inlet and outlet distances that must be complied with when installing fittings in pipe lines in order to achieve calm flow conditions. The most commonly used elements that could lead to turbulence in the flow are shown below. The related minimum inlet and outlet distances that ensure a calm flow are also specified.

Make sure that the measuring conditions at the point of measurement are calm and problem-free.

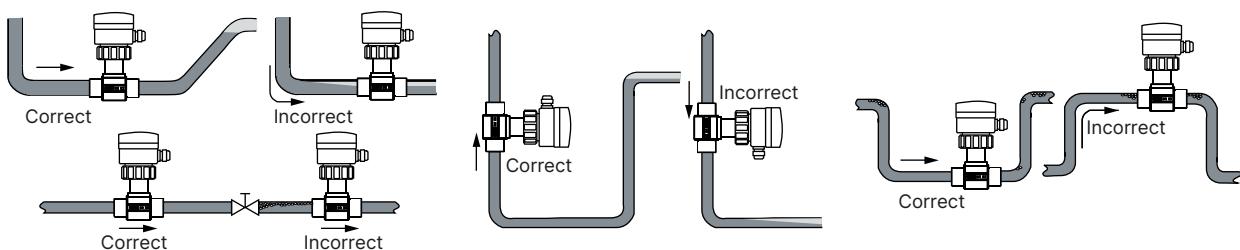

1.) If the valve cannot be mounted after the measuring device, the minimal distances have to be respected.

2.) If an expansion cannot be avoided, the minimal distances have to be respected.

Please note minimum flow velocity

The device can be installed in either horizontal or vertical pipes, but following additional conditions should be respected:

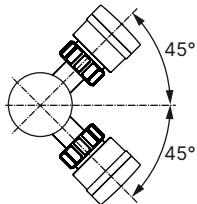

- The pipe always has to be filled with fluid at all times near the device.
- The pipe design must be such that no air bubbles or cavitation can form within the medium near the device at any time.

Pressure and temperature ratings must be respected according to the selected fitting material. The suitable pipe size is selected using the diagram in the chapter "Nominal size selection" of the **data sheet Type S020** ▶.

6.2. Mounting options

It is advisable to mount the flowmeter at a 45° angle to the horizontal centre of the pipe to avoid having deposits on the electrodes and false measurements due to air bubbles

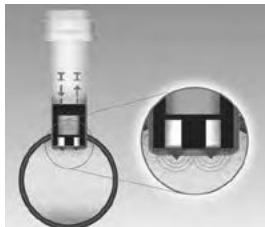

7. Product operation

7.1. Measuring principle

The E-shaped magnetic system inside the sensor induces a magnetic field into the fluid, which is perpendicular to the direction of flow. Two electrodes are in galvanic contact with the liquid.

Based on the Faraday law a voltage can be measured between these electrodes once a liquid (min. conductivity of 20 $\mu\text{S}/\text{cm}$) flows along the pipe. This voltage is proportional to the flow velocity.

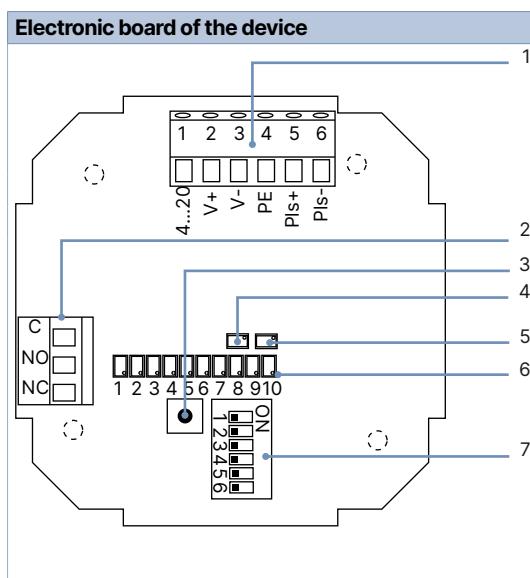

Using the K-factor for the individual pipe diameter the speed of flow is converted into volume per time.

7.2. Functional overview

Display on the electronic board (PCB)

The settings needed for operation are made directly on the printed circuit board by means of 5 switches, a push button, a green LED, a red LED and a bar graph.

Electronic board of the device	No.	Description
	1	Terminal strip: <ul style="list-style-type: none">Operating voltage4...20 mA outputFrequency output
	2	Relay connection
	3	Push-button
	4	Green LED: <ul style="list-style-type: none">Flashing once every second: the device is energized.Flashing once up to 5 times: to know which parameter the bargraph is indicating.
	5	Red LED: <ul style="list-style-type: none">Working mode (ON/OFF)Error signalling (flashing once up to 5 times)
	6	10 LED bar graph to view and set the device parameters
	7	<ul style="list-style-type: none">Switches 1 to 5 to configure the flowmeter (mains frequency, filtering level of the measurements, measuring range)Switch 6: unused

The device can be calibrated by means of the K factor (proportionality factor) of the fitting, or via the teach-in function.

Operating levels

The device has 2 operating levels:

- The Read level
- The Configuration level

Operating level	Functions
Read	<p>This level allows to read:</p> <ul style="list-style-type: none"> • the fluid velocity measured by the device. • the values set for the relay function.
Configuration	<p>This level allows to set the required operation parameters:</p> <ul style="list-style-type: none"> • Device using as a flowmeter <ul style="list-style-type: none"> – programming of the full scale <ul style="list-style-type: none"> – selection of a predefined measuring range: 0...2, 0...5 or 0...10 m/s – selection by teach-in: with the actual max. flow velocity of the application – 4...20 mA current output – 0...240 Hz frequency output – relay output: switching mode either window or hysteresis, on low or high switching threshold – relay time delay before switching – filter – alarm: <ul style="list-style-type: none"> – for full scale exceeding with 22 mA and 256 Hz – for fault signalling with 22 mA and 0 Hz • Device using an ON/OFF control <ul style="list-style-type: none"> – flow detection with switching thresholds, defined as a percentage of max. flow rate. – adjustment of the full scale of the device accordingly to the customer process full scale.

8. Product design and assembly

8.1. Product assembly

Note:

- The device Type 8041 is installed into a Burkert Insertion fitting Type S020 and fastened with a union nut.
- The Insertion fitting Type S020 ensures simple installation into pipes from DN 06...DN 400, see **data sheet Type S020** ▶ for more information.

The device is equipped with a PVDF or stainless steel measurement sensor which comprises two electrodes and a magnetic system and is available in long or short variant (dependent on the size of the used fitting). The sensor holder is plugged-in to the housing, which contains containing the electronic module.

The connection of the device to the process is made depending on the variant, either by a G 2" nut or a clamp.

The electrical connection is provided via two cable glands on a 6-pin terminal block.

Compact flowmeter with a G 2" process connection

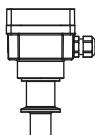

Complete device with a G 2" process connection for flow measurement Type 8041

Insertion fitting with a G 2" sensor connection Type S020

Fitting in stainless steel with a G 2" sensor connection Type S020 (only example)

Compact flowmeter with a clamp process connection

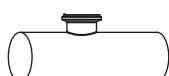

Complete device with a clamp process connection for flow measurement Type 8041

Clamp collar and seal (accessories, to be ordered separately)

Flowmeter with clamp process connection

Note:

The following variants

- have at least an 18...36 V DC operating voltage
- are supplied with an accessories set (Article no. 565384) and with a relay connection set (Article no. 552812).

Further information regarding the sets can be found in chapter ["10.5. Ordering chart accessories" on page 19](#).

Output	Material			Approval and conformity		Electrical connection	Article no.
	Housing	Sensor / Electrode	Fitting/flowmeter seals ¹⁾	FDA	ECR1935/2004 ²⁾		
Frequency, relay and 4...20 mA	PC	Stainless steel / Stainless steel	EPDM or FEP	Yes	–	2 cable glands M20 x 1.5	564688 ☈

1.) Has to be ordered separately.

2.) Only for mounting with EPDM seal

Remote transmitters Type 8025 which can be connected to the Type 8041 flowmeter

Description	Operating voltage	Output	Relay	Electrical connection	Article no.
Panel-mounted variant					
"Universal", 2 totalizers	18...30 V DC	4...20 mA, pulse	– 2	Terminal strip	419538 Ⓜ
					419537 Ⓜ
"Batch", 2 totalizers, 1 flowrate		–			419536 Ⓜ
Wall-mounted variant					
"Universal", 2 totalizers	18...30 V DC 115...230 V DC	4...20 mA, pulse	– 2 –	3 cable glands	419541 Ⓜ
					419540 Ⓜ
"Batch", 2 totalizers, 1 flowrate	18...30 V DC	–	2	5 cable glands	433740 Ⓜ

10.5. Ordering chart accessories

Description	Article no.
For flowmeter with G 2" or clamp process connection	
Set with two cable glands M20 × 1.5, two neoprene flat seals for cable gland or plug, two screw plugs M20 × 1.5 and two multi-way seals 2 × 6 mm	449755 Ⓜ
Set with two adaptors M20 × 1.5 /NPT ½", two neoprene flat seals for cable gland or plug and two screw plugs M20 × 1.5	551782 Ⓜ
Relay connection set with a terminal strip, a protective cap, a cable tie and a mounting instruction sheet	552812 Ⓜ
3-point flow calibration certificate ¹⁾	550676 Ⓜ
FDA declaration of conformity ²⁾	803724 Ⓜ
For flowmeter with G 2" process connection	
Set with a stopper for unused cable gland M20 × 1.5, a multiway seal 2 × 6 mm for cable gland, a green FKM seal for the sensor and a mounting instruction sheet	558102 Ⓜ
Set with a green FKM seal and a black EPDM seal	552111 Ⓜ
Fastening ring (open) for Type S020 Insertion fitting	619205 Ⓜ
PC union nut for Type S020 Insertion fitting	619204 Ⓜ
PPA union nut for Type S020 Insertion fitting	440229 Ⓜ
For flowmeter with clamp process connection	
Set with a stopper for unused cable gland M20 × 1.5 and a multiway seal 2 × 6 mm for cable gland	565384 Ⓜ
1 EPDM fitting/measuring device seal	730837 Ⓜ
1 FEP fitting/measuring device seal	730839 Ⓜ
Clamp collar	731164 Ⓜ

1.) Measuring device combined with a Type S020 Insertion fitting, only for DN ≤ 200

2.) For stainless steel or PVDF sensor with FKM or EPDM seal
