

Direct-acting 2/2-way plunger valve

- Gas valve with DVGW approval acc. to DIN EN 161, Class B
- Compact design
- Up to DN 25 and 150 mbar
- Body in brass
- Dirt filter in the inlet

Product variants described in the data sheet may differ from the product presentation and description.

Type description

Type 0293 switches without pressure difference from zero bar. The valve is especially good for switching low-pressure combustible gases. The direct-acting solenoid valve is delivered with circuit function A. It is normally closed. Upon switching, the magnetic core is tightened against the spring and the valve opens. A filter is built-in to the inlet. A dirt trap $\leq 500 \mu\text{m}$ (example our type TFU001) needs to be installed before the valve when using DN 25. This dirt trap needs to be accessible for maintenance.
